

DJA is a French manufacturer specialising in the corrugated board industry for more than 40 years.

DJA produces spare parts and cutting tools for all the makes and models of machines producing and converting corrugated board.

The **DJA** production facility is fully integrated and is composed of CNC machines, lathes, grinders and a heat treatment facility among others.... 70% of DJA's production is exported worldwide thanks to a multilingual technical team, in addition to an overseas sales network focused on the corrugated industry.

One of **DJA** strengths is to hold a large stock enabling supply within 24 hours wherever in the world.

The range of DJA is composed of more than 40 000 referenced parts from : BOBST®, MITSUBISHI®, BHS®, FOSBER®, AGNATI®, MARTIN®, GÖPFERT®, EMBA®, LANGSTON®, WARD®, CURIONI®, ISOWA®, LMC®, TCY®...

In addition to the standard parts, **DJA** also supplies special developments adapted to the market requirements in terms of paper quality and machine speeds for example (special lap cutting or scoring systems...)

The range of **DJA** is composed of :

CORRUGATING LINE :

- Clean out fingers and glue dams
- Tungsten carbide knives and diamond grinding stones
- Scorers and knife heads
